

APPAREL WORKBOOK FALL/WINTER 25/26

DESIGNED FOR THE
UNEXPECTED

HALTI

TESTED FOR THE UNEXPECTED

FOREWORD

As we step into the Fall/Winter 25/26 season, we enter a new chapter - one that honors our roots while embracing bold renewal. You'll see this reflected not only in our new brand identity but also in our assortment. For nearly fifty years, Halti has existed to create outdoor gear for the sports enthusiasts to go out and perform, regardless of the weather. What remains constant is our purpose: our products are designed for the unexpected.

At Halti, our identity is shaped by four pillars: Sisu, Legacy, Authenticity, and strong values. We have equipped Finnish Sisu for nearly fifty years, and that same sisu drives our own people to push forward, no matter the challenge. Our products are built on a legacy of testing and proving our gear in the world's most unpredictable conditions. Authenticity is our promise—we mean what we say and back it up with stories of real people's endurance, achievements, and struggles. And our values define our approach—we leave no one behind, creating high-quality, responsible products for everyone who shares a love for the great outdoors.

This season, we present a strong collection under the theme Tested for the Unexpected. Our products are globally credible, combining premium technical and functional features with sustainable material choices. In our marketing, we're highlighting those details, showcasing the excellence of Finnish design and technical expertise. We're pulling back the curtain on our test lab, offering a glimpse into the rigorous processes that every material undergoes. We're also celebrating the inspiring stories of our product testers—outdoor professionals, athletes, and nature enthusiasts—who put our gear to the ultimate test in real-world conditions.

I'm excited for what lies ahead. As our valued sales team, agents, and partners, you play a pivotal role in bringing this vision to life. Let's make Fall/Winter 25/26 the season that puts Halti firmly on the global map—driven by passion, grounded in authenticity, and designed for the unexpected.

AKI KUUSILEHTO, CEO

HALTI'S SUSTAINABLE DEVELOPMENT PROGRAMME

We come from the north, from the land of thousands of rivers and lakes, the land of forest. We are committed to preserving our environment for future generations. At Halti, we design timeless, durable products, and prioritize sustainable materials. We support circular economy through our Halti 2nd Round services. In our fight against climate change, we are determined to halve our emissions by 2030 and achieve net-zero by 2050. Our sustainable development program, "Think Ahead," encompasses our responsibility for social, environmental, and economic footprints. We have done a lot and we won't stop. We promise to think ahead and choose sustainability every day.

ENVIRONMENTAL RESPONSIBILITY

- We design and manufacture durable and timeless products with the design philosophy of considering the environmental effects of the whole product life cycle.
- We are a bluesign® system partner and demand that both our new and existing bluesign® subcontractors comply with the detailed bluesign® restricted substance list.
- Our products are made in compliance with the REACH regulations, which protect people and the environment from harmful chemicals.
- We only accept RDS down to avoid do the unethical treatment of animals such as forced feeding, the plucking of living birds, or mulesing method in wool production. We do not use real fur in our products.
- We use 3D design program, which optimizes the design process.
- Our DWR is PFAS-Free.
- Our Head Office follows WWF Green Office environmental management system to which WWF Finland has awarded the Green Office label on in 2022.
- We have launched Halti 2nd Round- concept with Repair and Resale and Donate- to promote and support our clients with circularity.

CORPORATE SOCIAL RESPONSIBILITY

- Our products are made in socially and ethically acceptable conditions.
- We expect all business partners to follow the Amfori BSCI and BEPI Code of Conduct which are commitment documents for amfori members and their business partners to exercise human rights due diligence and environmental protection in their global supply chains in line with internationally recognized principles. All our clothing and shoe factories must undergo BSCI or equivalent audits in risk countries.
- As a member of amfori BSCI, we actively exert our influence to promote economically, socially and ecologically responsible operations and maintain our awareness of these issues.
- As a member of the EOG and SOG, we take part in sustainable development projects in our industry and obtain first- hand information about matters relevant to our sector.

OUR FUTURE AIM

Since 2010, sustainable development has been an important element of Halti's business strategy. A lot has been done already, but we are continuously improving our activities and will continue to aim high. These are our concrete targets in the near future:

- We have made a Science Based Targets commitment and our target is to halve our emissions by 2030 and reach Net Zero by 2050
- We continue to increase the use of recycled materials in our products.
- We continue to increase the use of bluesign materials in our products.
- We aim to use only recycled/recyclable or renewable packaging materials.

SUSTAINABILITY SYMBOLS

	responsible down	The product contains standardized responsible down (RDS) or recycled down.
	pfc free	The shell material has PFC free water repellency treatment.
	bluesign	The product contains certified bluesign® approved material.
	eco cotton	The product contains organic cotton.
	circular	The product is designed and manufactured by the principals of circular economy.
	recycled	The product contains recycled material.
	recyclable	This product is crafted from a single material and is fully recyclable after its lifetime.
	bio-based	This product contains partly bio-based material.
	renewable	The product is made from renewable materials.

Huomioi että neon värit eivät tulostu oikean sävyisinä. Neon värit on merkitty N-kirjaimella.

On myös huomioitava, että neon-väriset vaatteet voivat haalistua sekä värjätä muita vaaleampia materiaaleja.

M-kirjain tuotteen värikoodin lopussa tarkoittaa, että materiaali on meleerattu.

Untuvavaatteissa untuvat voivat kuultaa läpi pääli- ja vuorikankaista.

Note that neon colours do not appear as bright as they should in the printout. Neon colours are marked with letter N. It should also be noted that neon-colours in clothing may fade and stain other lighter materials as well.

The letter M at the end of the product's colour code means that the material is melange.

In down clothing, the down may be visible through outer and lining fabrics.

SUSTAINABLE WARMTH IN THE COLDEST HUMID CONDITIONS

Technical and ecological paddings which are produced by high standards using recycled materials. Paddings are extremely light weight and they can maintain high heat ratio even when wet. As padding is water repellent and extremely breathable, it is suitable for really high activity, in cold and wet circumstances.

microtherm® **THERMOFILL**

This super soft down like filling contains small fiber clusters that are blowed into filling. This way fibers creates uneven structure that can capsule a lot of air inside and makes it very warm and lightweight.

microtherm **ARCTY®**

With extra fine and soft fibers this filling creates lofty feeling and super warm result. Many layers of fine fibers can capsule air very effectively and thus can be used in the coldest conditions.

microtherm® **DYNAMIC**

Enough warmth and technical functionality is key to this dynamic filling. Overlapping fibers creates stretchable structure that capsules air even with slim structure. Works perfectly with stretchable outshells.

064-0819 STAALA W DX JACKET

G34

G53

G64

P99

Women's Staala Jacket combines style and high performance, making it an excellent choice for various weather conditions. Its timeless design suits long hikes, trekking adventures, and everyday casual wear. The Staala Jacket features a water-repellent treatment from Rudolf Bio-Logic, 42% plant-based and PFC-free, ensuring you stay dry and comfortable. All seams are taped to prevent water ingress, and the water-repellent front zipper further enhances protection against the elements. The jacket includes a full-length drop-locked inner list, providing additional weather resistance. Functionality is a key highlight of the Staala Jacket. It comes with water-repellent hand pocket zippers and a zippered inner pocket to keep your essentials secure. For enhanced comfort, the jacket includes zippered ventilation openings. The adjustable fixed hood and cord-adjustable hem allow for a tailored fit, making it adaptable to various conditions. Reflective details and Halti branding add to its stylish appearance.

064-0633 HIKER W DX 3L VENTILATED JACKET

B57

The Hiker series DrymaxX® Nano 3Layer jacket from Halti is a masterpiece of years of product development and a trusted companion for every outdoor excursion. Thanks to our DrymaxX® membrane structure, Hiker is a high-quality and breathable shell jacket that meets the technical requirements of even the most demanding outdoorsmen. The timeless and straightforward design is inspired by classic Halti, both in functionality and comfort. The innovative DrymaxX® Nano membrane structure is waterproof and windproof – yet at the same time exceptionally breathable. Whether it's going for a trek, a walk in the woods, or an active hike, this garment is comfortable to move around in. With this lightweight but extremely reliable jacket, you can walk in nature for longer periods of time, even if the weather conditions vary. The design of the Hiker DX 3L also focuses on optimal adjustment. The underarms and sides have two-way zippers that can be easily opened. The hood, cuffs and hem are equally easy to adjust. The pockets are positioned so that they can be easily accessed, even when wearing a backpack. In addition, the Ripstop reinforcements on the back and on the arms are very resistant to abrasion. The Hiker series is one of Halti's most beloved classics. Its product development has reached its peak over thousands of walked kilometers and years. As you move around in this versatile, strong-surfaced jacket, you'll notice that we've thought of everything, as it is designed together with outdoor experts. Every detail has meaning. Combine the jacket with the Hiker DX 3L pants and enjoy the features of a high-tech outfit to the fullest. By adjusting the base and middle layers, you can wear this jacket outdoors in any weather.

Its timeless design ensures that you stay fashionable while exploring the outdoors or navigating city life. Crafted from bluesign® approved fabric, the Staalaa Jacket is finished with a water-repellent treatment from Rudolf Bio-Logic, which is 42% plant-based and PFC-free. This ensures you remain dry and comfortable even in changing weather conditions. The jacket is designed to be windproof and highly breathable, providing maximum comfort during your outdoor adventures. The interior mesh lining helps wick away moisture that builds up inside the jacket, and the breathability is further enhanced by zippered ventilation openings under the arms. The Staalaa Jacket features zippered hand pockets and a zippered breast pocket, keeping your essentials close at hand. An adjustable hood, hem, and cuffs allow you to customize the fit of the jacket to suit any situation, making it especially practical in windy and rainy weather. The Halti Men's Staalaa Jacket is a versatile choice for a variety of weather conditions and activities, offering both style and functionality for the modern outdoor enthusiast.

065-0409 LINJAT W PUFFER PARKA

C68

G73

P99

The Linjat puffer parka combines class and Halti's premium functionality without a single compromise. Gorgeous, windproof, and functional, the Linjat jacket adapts to different situations with ease and style. It keeps you warm on your way to work, the gym, and on a city stroll, besides being also an impeccable fit for after works and Saturday nights. Our signature DrymaxX® fabric, hood and inner rib knit cuffs keep cold and light rain out. Microtherm® THERMOFILL insulation makes the puffer extremely fluffy and warm yet breathable. The sleek look, subtle branding and black minimalistic reflective details result in a classic puffer you'll find yourself wearing on any occasion. Hers is made of slightly shiny fabric that adds a hint of elegance. Try it with heels on a Friday night and you might be surprised. Linjat is made of recycled polyester and is one of Halti's monomaterial pieces. Monomaterial refers to a product composed of a single material or fibre. Monomaterial design means that the garment is easier to recycle back to raw material. In other words, choosing monomaterial makes the recycling process more efficient resulting in premium quality recycled yarn – and therefore reduces the use of virgin materials.

065-0462 PENGER W PUFFER VEST

G01

G73

P99

The perfect combination of comfort and style without compromising on functionality. This versatile vest is designed to keep you warm, feel as comfortable as a down blanket, and exude both warmth and attitude. This gorgeous, windproof and functional puffer vest is perfect for any occasion. Use it as a warming layer on top of your shell jacket when you go to work, the gym or for a walk in the city. The long length and slits with snap fasteners offer an unbeatable combination of coverage and mobility. The DrymaxX® fabric keeps light rain out, making it ideal for use in the autumn. The stylish look, subtle branding and black minimalist reflective details complete the Penger vest. When you enter a department store or public transport, you can unzip the top of the double zipper. This feature also makes the Penger vest a favorite of drivers. The Penger vest is made of recycled polyester and is one of Halti's monomaterial products. Monomaterial means a product consisting of a single material or fiber. The use of monomaterial means that the garment is easier to recycle back into a raw material, as it does not need to be separated from other fibers. In other words, choosing monomaterial makes the recycling process more efficient, resulting in first-class recycled thread – and thus reducing the use of virgin materials.

G05

P99

Halti's Settler DrymaxX® Nano 3Layer pants are a masterpiece of years of product development and a trusted companion for every skier. Thanks to our DrymaxX® membrane structure, the Settler is a set of high-quality and breathable shell pants that meets the technical requirements of even the most demanding skiers. The timeless and straightforward design is inspired by classic Halti, both in functionality and comfort. The innovative DrymaxX® Nano membrane structure is waterproof and windproof – yet at the same time exceptionally breathable, so you always stay dry, no matter the weather. Whether it is a ski trip in Lapland, or skiing in the French Alps, these pants are comfortable to wear. With these lightweight but extremely reliable pants, you can go down the slopes for long periods of time, even if the weather conditions vary. The design of the pants has also focused on optimal adjustment. Combine the pants with the Settler DX 3L jacket and enjoy the features of a high-tech outfit to the fullest. By adjusting the base and middle layers, you can wear these pants outdoors in any weather. The Settler pants are always ready for adventures, adapting to any weather conditions.

G36

P99

Halti's Settler DrymaxX® Nano 3Layer pants are a masterpiece of years of product development and a trusted companion for every skier. Thanks to our DrymaxX® membrane structure, the Settler is a set of high-quality and breathable shell pants that meets the technical requirements of even the most demanding skiers. The timeless and straightforward design is inspired by classic Halti, both in functionality and comfort. The innovative DrymaxX® Nano membrane structure is waterproof and windproof – yet at the same time exceptionally breathable, so you always stay dry, no matter the weather. Whether it is a ski trip in Lapland, or skiing in the French Alps, these pants are comfortable to wear. With these lightweight but extremely reliable pants, you can go down the slopes for long periods of time, even if the weather conditions vary. The design of the pants has also focused on optimal adjustment. Combine the pants with the Settler DX 3L jacket and enjoy the features of a high-tech outfit to the fullest. By adjusting the base and middle layers, you can wear these pants outdoors in any weather. The Settler pants are always ready for adventures, adapting to any weather conditions.

067-0035 HUIPPU M DOWN HYBRID JACKET

G36

G53

P99

The Huippu down hybrid jacket is the perfect choice for those seeking a more active alternative to a classic down jacket. Combining RDS certified duck down filling with a fill power of 700 and Pertex Quantum ripstop fabric, this jacket ensures warmth and durability. The stretch sleeves and side panels provide enhanced mobility and comfort, making it ideal for active pursuits. Designed for optimal performance and layering, the Huippu hybrid jacket is warm, breathable, and packable. The dynamic fit allows for a sporty look while maintaining freedom of movement. The jacket features a stand-up collar, zippered front, and zippered hand pockets for convenience and functionality. Elastic bound sleeve ends and a cord adjustable hem ensure a snug and customizable fit. Reflective details enhance visibility in low-light conditions, adding an extra layer of safety. The jacket is finished with a PFC-free DWR treatment. Pertex® Quantum Ripstop is the elite of tightly woven microfibre materials. Bluesign® approved Pertex® Y series' Quantum material used by Halti include specific Y-shaped interlocked fibers inside the yarn that enable a highly wear-resistant structure in relation to the weight of the material. The result is a wear-resistant material which combines the pleasant outer layer of the fabric with improved water resistance.

088-0195 **PIHKA W II SHIRT**

G23M

G60

The Pihka II is a lightweight and soft women's merino wool undershirt that is suitable for many different uses. The merino shirt is comfortable to wear, as it does not rub or chafe. The shirt has a thin merino wool knit with an excellent warming ability – it is always dry and warm against the skin, and is able to keep its warmth even when wet. Merino wool is naturally antibacterial, so it is suitable for use all year round, from hiking to skiing. Halti's mulesing-free merino wool product is an ethical choice. Combine the shirt with the Pihka merino wool pants.

088-0196 **PIHKA W II PANTS**

G23M

G60

The Pihka II merino wool base layer pants are suitable for many different uses all year round. Merino wool is suitable for both hikers and skiers in winter. The base layer pants have a thin merino wool knit with an excellent warming ability – the pants are always dry and warm against the skin. Merino wool is naturally antibacterial, so it is also suitable for active movement. We use ethically produced mulesing-free merino wool in our Pihka products. Combine the base layer pants with a Merino wool undershirt.
